

Effective Körber WMS Implementation Delivers 200% Boost in Efficiency for a Logistics Market Leader

About Customer

A leading Denmark-based integrated container logistics company with an operational network spread across 125+ countries. A longstanding expertise in warehousing and logistics is leveraged to deliver transformative innovation that drives flexibility across global supply chains. The 90,000+ team utilizes an extensive distribution network to render end-to-end solutions from software to automation.

Business Challenges

- **Customer-specific process flows** resulted in complex business scenarios
- Increased complexities because of **volatile industry shifts**
- Inefficient implementation and support management due to **siloed vendor portfolios**
- **Outdate infrastructures** led to warehouse management and IT support challenges
- **Failed WMS implementation** in the EU

Our Solutions

- Effectively implemented highly configurable and adaptable **K-Motion WMS**
- Seamlessly migrated **EU business onto the Körber WMS**
- Empowered **24x7 operations support** across the Warehouse Management System
- Enabled the **onboarding of top 40+ end-customers in under 6 months**

Results

200% growth in efficiency for packing & picking

85% reduction in P1 and P2 incidents

35% boost in efficiency with reduced P3 incidents

20% reduction in annual maintenance cost

Improved **KPIs for the warehouse teams**

WMS implementation **extended to EU and US geographies**
